Jindabyne NSW 2627

Dear Mr Pasalich

### Re: New Communication facility at Eagles Nest (Thredbo)

Eden LALC Sites Officers Ben Cruse and Quentin Aldridge, carried out an Aboriginal Heritage Assessment on the above proposed development on Friday 12 February 2010, to locate artefacts and/or evidence of heritage extent.

No Heritage items or artefacts were located on the day, although this area has high potential for Heritage items occurrence.

#### Assessment Recommendations

Visibility was poor and so the need for test pit monitoring would need to be carried out before major works commence. Should heritage items be located during the test pitting, then further assessment should occur.

Should test pitting fail to reveal any heritage significance, then no further assessments are required and planned works will be able to proceed.

Please don't hesitate to contact this office if you require.

Yours sincerely

Ben Cruse  
Senior Sites Officer
